

Otter[®]

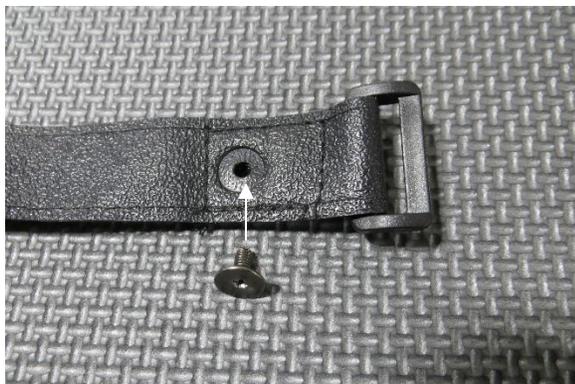

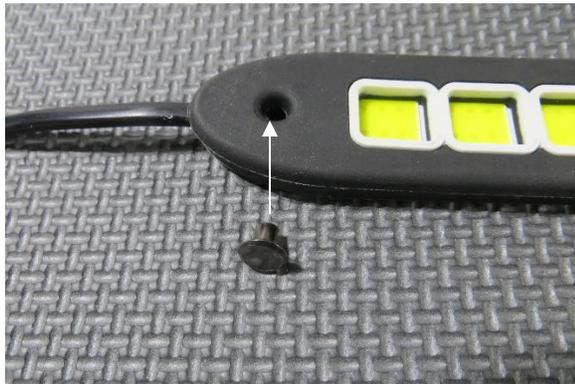

LED Light Instructions

1. For use in a hub tent insert the plastic clips into the holes near each end as shown below. They are designed to clip onto the poles in the hub.

There are two openings in the clip. Most hub poles will use the larger openings. Some smaller hubs will use the smaller openings. Use the one that fits the best for the particular hub pole.

2. For use in flip over shelters attach the straps as shown below. They can be fastened to any of the poles in the shelter.

3. The lights can also be attached to any flat surface using appropriate fasteners.
