## Windbreak Set-up Instructions

1. Layout Windbreak on the ice with the V facing into the wind as shown below. Thread ice anchor through the ice lock strap grommet and the grommet in the skirt. Using a drill or impact and an ice anchor driver, drive the anchor into the ice.

2. Pull out hub on one side and anchor it down using the anchor strap and ice anchor. Anchor down the outer corner using the ice lock strap, skirt grommet and ice anchor.

3. Pull out hub on the other side. Adjust angle of windbreak opening to desired size. Once the correct opening size is determined, anchor down that side using the anchor strap and an ice anchor.

4. Anchor outer corner using the ice lock strap and the grommet in the skirt. Adjust straps as necessary to tighten everything up.
